An Update on Falun Dafa Worldwide

VOLUME 2 ISSUE 31 AUGUST 16, 2007

Made in China by Forced Labor

(**Clearwisdom.net**) In recent years, the Chinese Communist Party (CCP) has gradually become a manufacturer for the world market. Cheap products made in China are filling international markets. How can China produce these products so cheaply? Many people just think that all labor is cheap in China. Actually, there is more to it – the fact is that many products are made with the forced labor of inmates detained in prisons and labor camps, including many illegally detained Falun Dafa practitioners. The photographs below are examples of products made by practitioners who are detained in prisons or labor camps.

Necklaces and bracelets

Butterflies

Children's Jewelry

These are just some of the products made by Falun Gong practitioners under duress in the Masanjia Forced Labor Camp in Shenyang City, Liaoning Province.

In addition to persecuting practitioners using brutal torture, murder, and sexual abuse, the Chinese Communist Party also uses forced labor and organ harvesting to make huge profits. Falun Gong practitioners are arrested and sent to prisons, labor camps, and brainwashing centers because they refuse to give up their belief in Falun Dafa and Truthfulness, Compassion and Forbearance. While they are subjected to physical mistreatment, they also are forced to do hard labor for over 10 hours a day in very poor working conditions to make products exported to the United States, Japan, Australia, and Europe. The economic exploitation of practitioners is an important part of the persecution of Falun Dafa by the CCP.

In reality, the products labeled as "Made in China" should be more accurately labeled, "Made in China by Forced Labor." The large amount of exported products made in China by forced labor directly violates the regulations of the World Trade Organization and has brought the CCP huge amounts of foreign currency. This income is used to further persecute Falun Gong and to pay bonuses to police officers and prison guards, as incentive to persecute practitioners.

When people talk about the economic "miracle" and the huge reserve of foreign currency in China, do they know how much blood has been shed behind the dark curtain?

Introduction to Falun Dafa

Falun Dafa, also known as Falun Gong, is a practice for benefiting physical health and elevating the mind. Introduced by Mr. Li Hongzhi in China, the practice consists of five gentle exercises including meditation, and diligent effort on the part of practitioners to follow the universal principles of Truthfulness-Compassion-Forbearance in daily life. Falun Gong is not only beneficial to one's own health and well-being, it also benefits others. Although the practice originated in China, today it is practiced throughout the world by people of all races and walks of life. In the face of the most brutal and vicious persecution perpetrated on them by the Chinese Communist Party, Falun Gong practitioners have found the spiritual strength to resist peacefully and tirelessly by upholding the principles of Truthfulness-Compassion-Forbearance.

About Clearwisdom

Clearwisdom.net is the most authoritative source of information about the practice of Falun Gong and about the persecution of Falun Gong in China, reporting timely news and events happening inside China as well as from the more than 70 countries around the world where Falun Gong is practiced. Clearwisdom responsibly publishes the experiences and understandings of practitioners themselves, who submit the majority of the articles.

Act Now to Help Stop Communist China's Murder for Profit

China Stealing Human Organs for Profit: Investigation Leads

(Clearwisdom.net) After the Chinese Communist Party's (CCP) genocidal crimes of harvesting organs from living Falun Gong practitioners and cremating their bodies to destroy the evidence were exposed, the Falun Dafa Association and the Minghui/Clearwisdom websites founded the "Coalition to Investigate the

Persecution of Falun Gong in China" (CIPFG) on April 4, 2006, to collect investigation leads throughout China. The following are some of the investigation leads recently collected. We hope that people with inside information will continue to help us expose how forced labor camps, prisons and hospitals have collaborated in persecuting Falun Gong practitioners, so as to help stop the persecution.

Investigation Lead: One only needs to wait a little more than 10 days to receive a liver at the Chongqing Southwest Hospital

Chen Shiyong from Pengshui County, Chongqing City received a liver transplant at the city's Southwest Hospital (an army hospital). She only had to wait a little more than 10 days to get a liver. The source of the liver was not disclosed and it was suspected that the liver was from a Falun Gong practitioner.

Investigation Lead: The Mining Bureau General Hospital of the Liaoning Tiemei Group is able to find a kidney within a few weeks

Bai Yuxiang, male, over 30 years old, was employed in the Ventilation Area of the Dalong Mine, Tiefa Coal Industry Group Corporation Limited (Tiemei Group). He was a resident of Daming Township, Diaobingshan City. In 2004, Bai Yuxiang spent only 20 thousand yuan for a kidney transplant at the Mining Bureau General Hospital. At that time, employees of the mine each donated 30 yuan for the transplant. It only took the hospital a few weeks to find a matching kidney. It was said the kidney came from an executed prisoner, but no one knew who the prisoner was. Bai Yuxiang survived for over a year and then died.

The Wonders of Dafa – a Blind Man Recovers Eyesight

The true story of a family in Jiaozhou City, Shandong Province, China

The three people in this family were miserable. The father was 62 years old, suffering from serious necrosis at the top of his femur and a prolapse of a lumbar intervertebral disc. He could barely work. The mother was 57 years old and suffered from periarthritis in her shoulder which made it hard for her to do any physical work. The worst misery was with their son, Gao Shan (alias), 32 years old, who was blind since birth. The family lived a very hard life. One day, the father read in a flyer that Falun Gong has seemingly miraculous health benefits. He wanted to give it a try.

One day, the father met a Dafa practitioner who shared with him the positive effects of Dafa. He invited the practitioner to his home. It is dangerous to do so in China's current environment of persecution, but the father was too desperate to do otherwise. After the practitioner talked to him about Falun Gong, the father asked the practitioner to teach him the Falun Gong exercises. The whole family began to practice Falun Gong. Gao Shan was still blind, and couldn't learn the exercises, so the practitioner told him to recite, "Falun Dafa is good." The practitioner said, "The more faithfully you do it, the better."

Sure enough, in a month, Gao Shan could see his fingers. It delighted the family. They told the practitioner who taught them the exercises, and then Gao Shan began to practice Falun Gong as well.

Before long, someone died in the village and a funeral was held. It's customary for everyone in the village to attend a funeral in China, so Gao Shan went along as well. Many neighbors came to greet him. After seeing that Gao Shan could see, how could they ignore such a miracle?

Someone tested his eyesight, asking him the number of wires on electric poles, etc. Gao Shan counted the wires correctly. All the neighbors were astonished.

Someone asked Gao Shan curiously, "How did you recover your eyesight?" Gao Shan answered, "It was Falun Gong that cured my blindness."
